

6516207714.txt

My husband is a long-distance truck driver and relies heavily on the XM Radio Instant Traffic & Weather reports he gets throughout the day. He pays a monthly fee to use this service, and if the ability to receive continuous weather updates is taken away, he will have no need for the XM Radio. Knowing the current and upcoming weather in the part of the country to which he's driving makes it easier for him to map out the route he can safely take to his next appointment.

I urge you to oppose HR 4026 and reject NAB's petition 04-160.
